PROFESSIONAL SUMMARY

ECE undergraduate (CGPA 8.21) with a working foundation in digital logic design, communication systems, and networking fundamentals. Comfortable programming in C and Python, using Verilog HDL for basic RTL design, and working with Git/GitHub. Completed coursework in networking and network automation through NVIDIA Academy and cybersecurity fundamentals through Cisco Networking Academy. Looking for an internship where I can apply my electronics, programming, and networking coursework to real telecom or digital systems problems.

EDUCATION

KLH University — B.Tech in Electronics and Communication Engineering CGPA: 8.21	<i>Sept 2023 – May 2027</i>
SR Junior College — Intermediate (MPC) Score: 96%	<i>2021 – 2023</i>
Mary Mediatrix High School — SSC CGPA: 10.0	<i>2021</i>

TECHNICAL SKILLS

Programming: C, Python (Basic), Java (Basic)

Networking & Systems: Networking Fundamentals, Basic Network Automation (Ansible), Cybersecurity Fundamentals

Hardware & Digital Design: Verilog HDL (Basic), Digital Logic Design, CMOS Fundamentals, Combinational & Sequential Circuits

Core Subjects: Electronic Devices, Analog Electronics, Signals & Systems, Circuit Analysis

Tools: Git, GitHub, Ansys STK, Basic Circuit Simulation Tools

PROJECTS

Digital Logic Design using Verilog

- Built combinational circuits (adders, multiplexers) and sequential circuits (flip-flops, counters) in Verilog HDL.
- Worked through timing behavior and basic logic optimization while testing each design.

CMOS Inverter Analysis

- Analyzed the voltage transfer characteristics and switching behavior of a CMOS inverter.
- Studied power-delay trade-offs at the transistor level to understand circuit performance.

Electronic Circuit Simulation

- Simulated circuits to observe voltage response, current flow, and signal behavior.
- Verified circuit functionality and worked on debugging when simulated output didn't match expected behavior.

RELEVANT COURSEWORK

Digital Electronics, Analog Electronics, Signals & Systems, Electronic Devices & Circuits, Digital System Design.

CERTIFICATIONS

- Introduction to Networking — NVIDIA Academy
- Ansible Essentials for Network Engineers — NVIDIA Academy
- Introduction to Cybersecurity — Cisco Networking Academy
- STK Certification (Level 1) — Ansys
