

Bommidi Sai Pranith

Hyderabad, India

2320040149ece@gmail.com — +91-8790849201

Objective

Full Stack Engineering Intern with hands-on experience in building scalable web applications using modern JavaScript frameworks. Strong foundation in backend logic, frontend design, and system-level thinking with a focus on performance and clean architecture.

Technical Skills

Languages: C, Java, Python

Frontend: React.js, HTML, CSS, JavaScript

Backend: Node.js, REST APIs

Core: Data Structures, OOP, DBMS, OS

Tools: Git, GitHub

Projects

TaskFlow – Full Stack Task Manager

- Developed a scalable task management system using React.js and Node.js
- Designed REST APIs and implemented CRUD operations with efficient data handling
- Built responsive UI ensuring cross-device compatibility and smooth UX
- Structured modular components for maintainability and performance optimization
- Optimized rendering and reduced unnecessary re-renders in React components
- Followed clean coding practices and modular architecture design

Algorithmic Problem Solving

- Solved 100+ DSA problems focusing on time and space complexity optimization
- Applied concepts like recursion, hashing, greedy algorithms, and dynamic programming
- Strengthened analytical thinking through consistent coding practice

Core Data Structures Implementation

- Implemented stacks, queues, linked lists, and trees from scratch
- Compared performance of different data structures for real-world scenarios
- Practiced memory-efficient implementations and edge case handling

Achievements

- Consistently practicing Data Structures and Algorithms to improve problem-solving ability
- Built multiple mini-projects to strengthen full stack development skills
- Strong analytical and logical reasoning skills applied in real-world coding problems

Education

KLH University

B.Tech in Electronics and Communication Engineering

CGPA: 8.21

2023–2027

Certifications

Cisco Networking Academy – Cybersecurity

NVIDIA – Networking Fundamentals

NVIDIA – Ansible Essentials for Network Engineers

Technical Interests

Full Stack Development, Scalable Systems, Software Engineering, Problem Solving
